ROSS ENERGY
DEEPER UNDERSTANDING

History

about MDS

In the heart of Andalusia, where the sun kisses the Mediterranean shores, Málaga Drilling School has carved its own niche in the realm of energy education. The school emerged as a response to the growing demand for professionals to be accredited to work in the drilling industry.

Málaga Drilling School stands as a testament to the foresight and expertise of its **founder, Pete Blakeston**. Established in 2007, this institution has thrived under the guidance of a seasoned expert, bringing a wealth of experience as a rig manager to the realm of training and performance in drilling sites.

The merge with Ross Energy in 2022 marked a significant milestone in Malaga Drilling School's journey. The Danish company, with its rich history and global expertise, saw potential in combining forces with the Andalusian institution, recognizing the synergy between their visions for excellence in drilling education. The merger set the stage for a new era of international collaboration and innovation. Diversifying its course offerings to include a broader range of disciplines beyond traditional drilling. New courses emerged, spanning areas such as environmental sustainability, digital technologies, and diverse facets of the energy sector.

Mandatory Courses in Oil and Gas Industry

International Well Control Forum (IWCF) and International Association of Drilling Contractors (IADC) establish mandatory well control training and certification requirements to ensure the safety and competency of personnel working in the drilling industry.

Accreditation

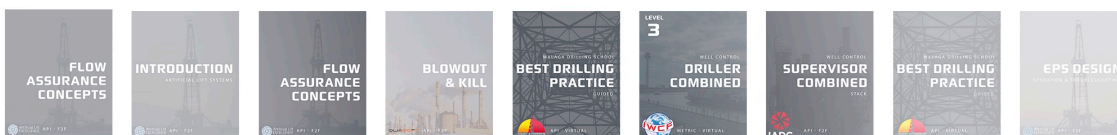

MDS 15 years as TOP TEN Training Centers in the World

At Malaga Drilling School (MDS), we take great pride in our well control courses, boasting an impressive success rate of over 86%, one of the highest in the industry. This achievement underscores our commitment to delivering high-quality education, utilizing experienced instructors, innovative teaching methods, and hands-on training. We continuously improve our programs to align with global standards, ensuring our participants are well-prepared for the challenges of the drilling industry. The success of our participants reflects the efficacy of our approach in producing competent professionals in well control.

- 90% success rate
- Courses EVERY WEEK
- Face to Face and Remote location
- IWCF Well Control Level 2,3,4
- IWCF Well Intervention 2,3,4
- IADC WellSharp

OVER 15 PERFORMANCE AND SKILL DEVELOPMENT COURSES

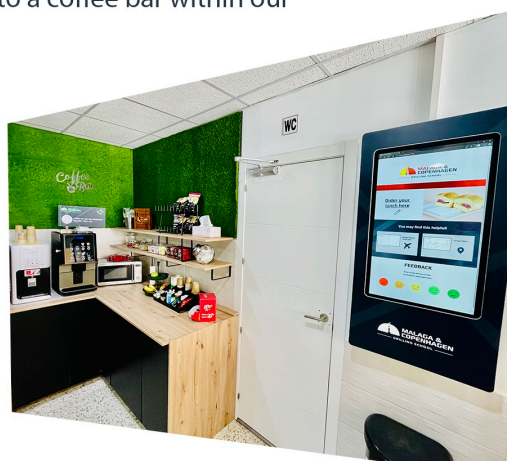

Facilities

over 4200 square meters

Our courses typically span a duration of 5 days, running from 8:30 AM to 5:00 PM. During this time, candidates have the convenience of enjoying lunch and access to a coffee bar within our facilities. All of which are included in the course fee.

- **Top Tier In House and Remote Simulators**
- **Catering and Coffee Bar**
- **Safe and lovely environment at Torremolinos city center**
- **More than 35 hotels and leisure facilities in the area**

3t Drilling Systems

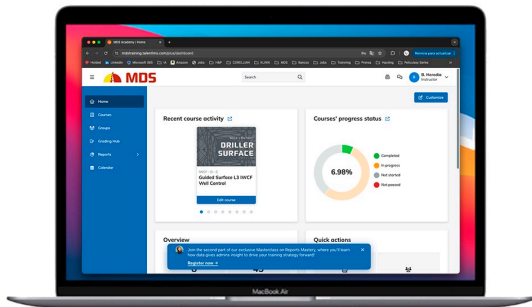

At Malaga Drilling School, we are dedicated to ensuring the cutting-edge relevance of our training facilities. Currently, we are in the process of upgrading our simulator to the latest version, aiming to enhance its performance in Well Control and Well Intervention. Through our partnership with 3T Drilling System, we proudly offer DS-20, DS-50, and CS simulator setups, both in-house and virtually. This commitment to advanced technology underscores our commitment to providing top-notch training experiences for our participants.

Introducing Our New E-Learning Platform

Experience the cutting-edge in online education with our new Learning Management System (LMS). Our platform offers a comprehensive suite of tools designed to enhance the learning experience:

Video Tutorials with Updated Animations:

Engage with dynamic, visually appealing content.

Smart and Adaptive Exercises:

Benefit from AI-powered exercises that tailor homework to each learner's unique needs..

Upcoming features:

Multilingual Video Tutorials and Captions

Continuous Learning

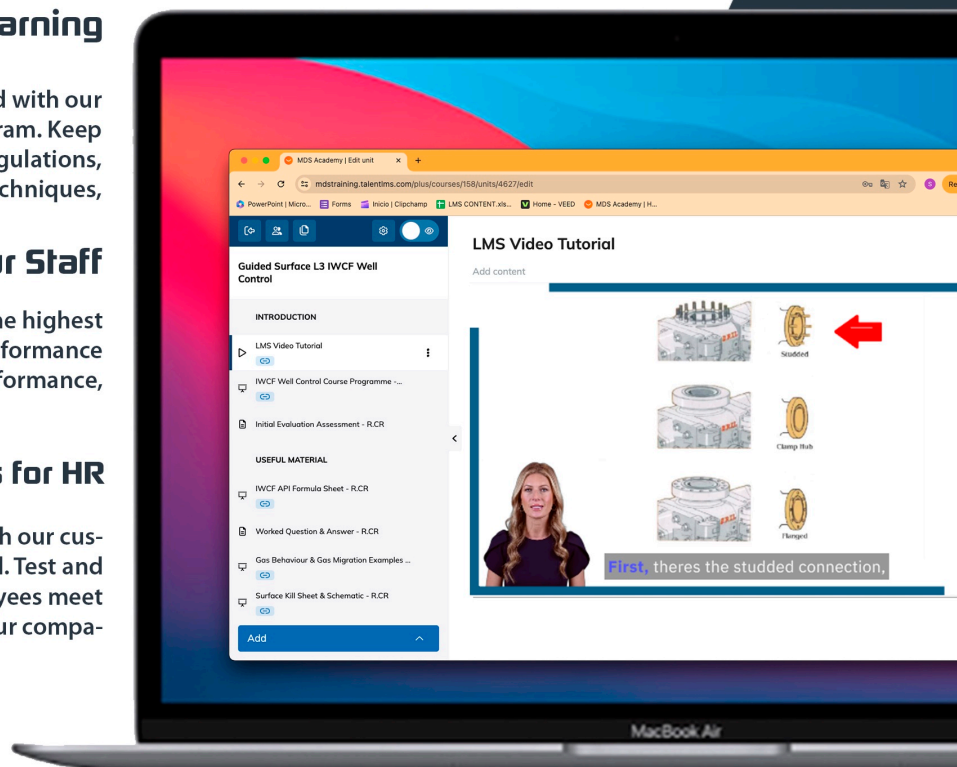

Stay ahead in your field with our continuous learning program. Keep up-to-date with the latest regulations, techniques,

Evaluate Your Staff

Ensure your team meets the highest standards with our detailed performance reports. Assess knowledge, performance,

Talent Acquisition Tools for HR

Streamline your hiring process with our customizable, white-label portal. Test and verify that prospective employees meet industry standards, all under your compa-

New Goals

Wind Energy Safety Training

GWO standards are created by the industry, for the industry. Our members are globally leading turbine manufacturers and owners, representing a majority of installed wind energy capacity around the world. Together, they share risk information and expertise to create training standards that improve safety and build a competent workforce.

Wind Energy Manufacturers Training

At MDS, our commitment is to provide manufacturers, partners, and operators with ongoing training programs tailored for the personnel responsible for managing projects, maintenance, and services related to wind turbines. As wind farms approach their service life expectancy, the industry is facing an overwhelming demand for skilled professionals, and we recognize the urgent need for effective solutions in addressing this workforce shortage.

-- Prioritize safety with our training, reducing the risk of accidents and fostering a secure working environment.

- Trained personnel to enhance overall turbine performance, boosting energy production and reliability for an efficient wind farm operation.

- Cost-Efficiency: Invest in training to minimize downtime, prevent errors, and reduce operational expenses, ensuring a maximum return on your wind energy infrastructure investment.

New Goals

Solar Power Training Regulations

SolarPower Europe, the premier association for the European solar PV sector, unites 300+ organizations. Collaborating with members, we shape regulations and business landscapes for solar's growth.

As a prospective solar power training facility in Europe, we aim to prepare individuals for successful careers in the renewable energy industry:

Our future programs will cover all aspects of solar power, aligning with industry standards and European regulations.

We are actively working towards partnerships with solar power manufacturers, companies, and regulators to ensure our training stays current and industry-relevant.

Our upcoming comprehensive career services, including industry connections, will support graduates in navigating job opportunities.

Walk with us

We are looking for Talent

We are actively seeking individuals with talent, expertise, and a passion for energy industry. We welcome potential collaborators, industry experts, and forward-thinking partners to join us on this mission, contributing their insights and skills to make this vision a reality. Together, we aim to continuously improve and shape the future of the energy education."
